Crabtree, Rohrbaugh & Associates began the design of its first educational project in 1993 – since then we have designed over \$2 billion of educational facilities.

At Crabtree, Rohrbaugh & Associates we specialize in public school, corporate, local and state government facilities. Based in Mechanicsburg with an office in Charlottesville, Virginia we employ more than 90 professionals and provide our services nationwide.

Crabtree, Rohrbaugh & Associates' corporate philosophy of "Providing a Client-Oriented Approach to Architecture" has allowed the successful completion of many state recognized and award winning projects.

Our firm's philosophy is steadfast in the belief that design is good only when it meets the client's needs. In meeting these needs good design must be on budget, on schedule, successful in function, well-executed, in harmony with its environment and pleasing to both the observer and to the people who use the structure.
